

RG660MK KWS + Home Assistant Deployment (v2)

Summary

Feature	Status	Notes
KWS Wakeup	BLOCKED	glibc vs musl
MQTT Broker	OK	docker mosquitto:2
MQTT Bridge	OK	procd daemon
Home Assistant	PENDING	docker pull ongoing

- KWS Blocker**
- sherna-onyx PyPI: only manylinux_aarch64 (glibc), no musllinux
 - Prebuilt binary NEEDED: libc.so.6, ld-linux-aarch64.so.1 (glibc)
 - RG660MK (musl) -> not found
 - Fix: cross-compile or wait for musl wheel

Home Assistant Progress

- MQTT broker: docker eclipse-mosquitto:2 (port 1883) OK
- mqtt_bridge.py: pure stdlib MQTT 3.1.1 + Discovery
- procd init: /etc/init.d/mqtt_bridge (daemon, respawn)
- Verified: bidirectional control (ON/OFF -> bulb -> state)
- HA container: docker pull homeassistant/home-assistant:stable (ongoing)
- Next: init HA at http://192.168.1.244:8123, add MQTT integration
